

Dear EU official,

*Did you know that my family's life changed forever after the setbacks in 2020? When you brought together civil society, governments and others to share their views about how to rebuild better after the coronavirus outbreak, we saw democracy in action. We were so inspired we set up people's assemblies in every neighbourhood! I'm actually going to one this afternoon!*

*Today we're evaluating, together with our mayor, the wellbeing budget that we introduced a decade ago. Thanks to that, our well-lit streets are safer, especially for women and girls, and every household has access to energy and running water.*

*I was even able to set up my own hair salon! A four-day working week allows me to have more spare time to spend with my children and even give classes on setting up and running a small business - a dream come true!*

*Greetings from an equal future,  
Ahmed*
