

*Dear EU official,*

*Today, 30 years after the pivotal year 2020, we can proudly say our continent followed the right path. Your political push and assistance for a global, inclusive, green transition helped us invest in environmentally friendly, safe and accessible infrastructure and mobility.*

*Now we not only have sustainable transport within my city, but also to and from other towns and cities, and even across my beloved continent.*

*These crucial investments gave us clean air, lush forests and clear rivers. Today, on the train to my work, I saw some geese fly on their migration route across clean, blue skies - I feel so grateful.*

*Greetings from a blue sky future,  
Jendayi*
