The EU’s Multiannual Financial Framework (2021-2027) allocates €110.6 billion to external action. But, how much of that goes to supporting the achievement of gender equality globally?

**The Current Targets**

- **The Gender Action Plan III (GAPIII)** set the ambitious agenda of having gender as a significant objective (OECD marker G1) in 85% of new programmes.
- **“Global Europe”**, which accounts for the biggest share of the EU’s external action funds, introduced a new target whereby 5% of new programmes must have gender as a principal objective (OECD marker G2). GAPIII tried to mirror this target by committing to at least one action with gender equality as a principal objective supported in each country.

**Recommendations**

- The European Commission, the EEAS and Member States must use the GAP and the Global Europe instrument’s mid term reviews as binding milestones to achieve the gender targets by 2025 and report annually and transparently on them;
- The European Commission and the EEAS must commit to funding targets expressed in share of ODA for gender equality during GAPIII mid-term review: 85% of ODA going to G1/G2 programmes and 20% of ODA going to G2 programmes. Member States should endorse these additional funding targets;
- The European Parliament must keep all EU institutions accountable for reaching the existing gender targets and continue calling for funding targets expressed in share of ODA.

**What do they mean?**

These targets only relate to the share of new programmes rather than the absolute quantity of funding. They do not set any goals for the EU regarding the amount of funding that should go towards gender equality.

- **11.5 Billion (C) Share of Programmes**
  - For example, the 85% target of new programmes on gender equality translated into 11.5 billion for gender equality in 2019.

- **12.9 Billion (C) Share of ODA**
  - However, if an 85% target measuring the share of Official Development Assistance – or ODA – were used, the total funding for gender equality would be 12.9 billion; in 2019.

**What would this money translate into?**

- **1.4 Billion Euros Are Being Missed Out On**
  - It could be used to avert 12 million cases of female genital mutilation (FGM).
